PROFILE

Full Stack & DevOps Engineer experienced in building and maintaining production web applications across the entire software delivery lifecycle. I work across frontend interfaces, backend APIs, databases, cloud infrastructure, CI/CD automation, deployment, optimization, and production support.

EXPERIENCE

Full Stack Developer / DevOps

PawnHero Pawnshop | Feb 2024 - Present

- Provision and maintain AWS and Google Cloud infrastructure, including compute, storage, and application services.
- Build CI/CD pipelines and dependable deployment workflows using GitHub Actions and Bitbucket Pipelines.
- Deploy, monitor, and optimize applications across Firebase, AWS Amplify, EC2, Nginx, and PM2.
- Improve production reliability through performance tuning, incident resolution, and proactive maintenance.

Full Stack Developer

PawnHero Pawnshop | May 2023 - Feb 2024

- Delivered enterprise features spanning React interfaces, backend services, REST APIs, and relational data.
- Optimized database queries and application flows to improve responsiveness and reliability.
- Collaborated with product and engineering teams to ship cohesive, integrated workflows.

Backend Developer

PawnHero Pawnshop | Nov 2022 - May 2023

- Developed and maintained REST APIs for core pawnshop workflows and production applications.
- Integrated backend services with relational databases, resolved defects, and improved performance.

TECHNICAL CAPABILITIES

Product engineering

JavaScript, TypeScript, React, Next.js, Tailwind CSS, Node.js, Express
